

## Zach Bush, MD

Zach Bush, MD is one of the few triple board certified physicians in the country, with expertise in Internal Medicine, Endocrinology and Metabolism, and Hospice/Palliative care. Dr. Bush's academic career has resulted in award winning microbiology, clinical care, and medical education. He is quickly becoming a leader. The breakthrough science that Dr. Bush and his colleagues have delivered offer profound new insights into human health and longevity. In 2012 he discovered a family of carbon-based bacterial metabolites with redox potential, and his team has subsequently demonstrated that this cellular communication network functions as an antidote to gluten, glyphosate, and many other dietary, chemical, and pharmaceutical toxins that disrupt our body's natural defense systems. Dr. Bush points to his kids as the driving force behind his passion for reformation of the medical and food sciences.
